

1. In class, we discussed some questions regarding measurements. Let's reengage in this topic by answering the following questions.

*What is a square?*

*How many inches are in a foot?*

*How many feet are in a yard?*

*How many inches are in a yard?*

*What is the difference between a foot and a square foot?*

2. Jarvis' mother wants to build a flower bed similar to the one in the picture below. The flower bed will be square and have a length of two yards on each side. The blocks that will edge this flower bed will be squares that are six inches in length. How many of these blocks will Jarvis' mother need? Explain how you solved this problem.
